GM5 stage deck

Features

The GM5 stage deck ensures ease of handling. With a self-weight of only 28 kg for a standard 2x1-metre deck, the GM5 weighs 7 kg less than the PROLYTE BasicLine deck and 10 kg less than the TopLine deck. Additionally, it comes equipped with a built-in pocket for a secure grip, making transportation easy. The surface features a non-slip hexagon layer, guaranteeing safety in various environments.

The GM5 deck boasts an impressive load capacity of 500 kg/m² considering its light weight. With a total deck height of only 5 cm, it stands out as one of the thinnest profiles available on the market, optimising storage space and enhancing portability for your company and crew.
